ENVIRONMENTAL

INTERIOR & EXTERIOR MDF DOORS

EXECUTIVE
DOOR COMPANY

WWW.EXECUTIVEDOOR.COM

We founded Executive Door in 1985 to provide builders, architects and consumers with unique custom doors. Our goal was to provide doors that met the customer's individual needs and produce them to the highest standards of architectural doors.

While our culture remains rooted in the strict standards of custom millwork, the needs of our customers have drawn us into a constantly improving assortment of innovative new door products.

In 1992, we introduced Environmental doors – one of the nation's first series of paintable, medium density fiberboard doors. Produced from high quality recycled materials, Environmental doors meet the need for durable, highly flexible door designs sensitive to the needs of our environment.

In 1998, we introduced Euro doors. Their finely machined asymmetrical panel design and offset interior face give the unique appearance of much thicker custom made doors. Window and Door Magazine recognized the Euro door's design excellence with the 2000 Crystal Achievement Award as the most innovative new door design.

In 2003, we doubled the production capacity for our popular MDF doors with a state-of-the-art production process that will assure EDC remains at the forefront of the industry.

In 2004, we introduced Environmental doors with a new honeycomb core. Responding to the needs of builders and installers, this new construction process results in a lighter weight door with all of the environmental, design and durability features of our traditional Environmental products.

Today, Executive Door remains committed to providing constantly improving products and innovative door designs consistent with our heritage of custom millwork.

Jerry Crittenden & Teresa Sinatra
Founders

EXECUTIVE
DOOR COMPANY

Our Environmental doors are a creative and important alternative to standard door construction. This unique product line uses wood materials that lumber mills typically discard. Our doors are made from a reformed product, known as medium density MDF, to create uniquely beautiful door designs and contribute to a better environment.

Executive Door is proud to be a part of the solution in eliminating wood waste.

Our signature product is the "Euro Door". These doors bring sophistication and one-of-a-kind beauty to any home. These unique and distinguished designs are fresh and new, unlike any other product currently on the market. Euro Doors make a dramatic statement on the outside with deep carved panels, giving the illusion of being 3 inches thick. This requires the back side to be carved similar, yet offset to maintain the integrity of the door.

The beauty of our Environmental doors is dramatically enhanced with the addition of glass panel inserts. These inserts are available in a wide range of designs, from the simply elegant to the distinctively ornate. The designs catch and reflect light, from the finely cut beveled panels to the intricate came. The exquisite workmanship found in these inserts reinforces the standard of high quality found in all Executive Door products.

All environmental doors include a limited lifetime warranty.

DETAILED SPECIFICATIONS

SIZES

Width: 1'0" through 4'0"

Height: 6'8" through 8'0"

Thickness: 1 3/8", 1 3/4" and 2 1/4"

LIMITED LIFETIME WARRANTY

All Environmental and Environmental Euro doors are backed by a limited lifetime warranty. Copies are available from Executive Door or at www.executivedoor.com

FACTORY PRIMING

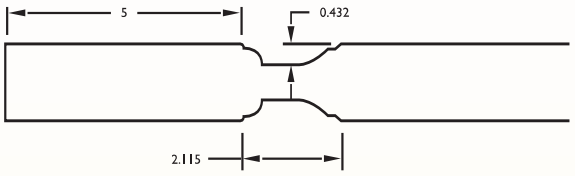

All doors are factory primed on all six sides.

Optional Premium Priming is available. Premium Priming consists of two generous coats of primer on all six sides.

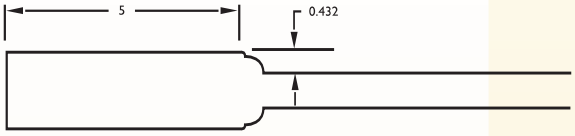

(Factory priming is not a substitute for complete field finishing)

Standard sticking and raised panel profiles represent the most popular construction. Unless otherwise specified, doors are quoted and produced in these profiles.

Optional sticking and raised panel profiles must be specified. Executive Door also produces custom doors to your specification. For custom designs and profiles please submit a detailed drawing including the sticking and panel profile.

HONEYCOMB CORE CONSTRUCTION

Originally developed in the aerospace industry, honeycomb construction is widely used in airplane, high speed rail car and crash barrier construction. It is the choice for any application requiring an exceptional strength to weight ratio.

Environmental Doors with honeycomb core are comparable in weight to solid wood doors, yet 30% lighter than comparable solid MDF doors.

Not available in Euro Doors, Fire Doors or Flat Panel Doors

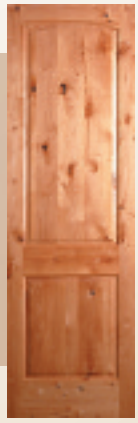

1. HONEYCOMB CORE
2. PREMIUM MDF
3. WOOD EDGE STRIP
4. PREMIUM MDF
5. SOLID INTERNAL TOP AND BOTTOM RAILS
